ABSTRACT

This is a summary of Pet Clump's progress before week 8. The report includes sections of the things we plan to change, the things we think are good to keep, the things we think that we should start to use that will benefit us, and a list of the tasks and user story points completed at this stage.

KEYWORDS

User story, tasks,, start, stop, keep, average, burnup chart.

1. Actions to Stop doing:

1. Not adding anymore additional features to the app at the very last sprint

2. Actions to start doing:

1. Split work more evenly among members and try to help others out when some member have problems.

3. Actions to keep doing:

1. The team should schedule more of the group coding section so that the team will catch up with the sprint plan and that also makes the work more efficient.
2. The team should make a more accurate estimation of the work tasks, since the sprint tasks are not finished smooth as we thought, and team have to work together on the last day of the sprint in order to complete the tasks.
3. To work remotely when it's not convenient to make it to the coding section on Sunday.

4. Work Completed:

List of user stories that are completed for sprint #2:

1. 12pts - As a user, I want to add friends and have a friend list where I can see friend requests and the last two lines in chat history for each friend.
   - -generate a list of friends profiles in the friend list page.
   - -displaying two lines of chat history for each friend in friend list page.
   - -being able to click on the profile pic of the friend to enter the one-to-one chat page.
   - -being able to send a friend request and click on the "add" button
   - -being able to see a friends request on the notification icon.
2. 24pts - As a user, I want to chat with my friend one on one.
   - -have a UI for the one-to-one chat message
   - Generate a key value string the chat.
   - Able to send message.
   - Have encryption for message
   - -bottom window will be the place where you can type in your message and also there is a send button for you to click on when you finish typing.
   - Displaying the profile pic of your friend and you in the chat UI.
3. 11pts - As a user, I want to be able to report to app about the scam profile of the pet when matching. And the content manager can ban user.

    ○ have a report icon inside the profile of each pet profile.
    ○ being able to delete the scam profile
    ○ have algorithms on what to decide the profile is actually a scam

Total: 47 36 story points

5. Work Completion Rate:

1. Total number of user stories completed: 2.
2. Total point of the completed user stories points: 36 points.
3. Total number of hours spent for this sprint: 20+ hours.
4. Total number of days for the sprint: 2 week.
5. Number of sprint finished across all sprint plans: 3/4.
6. Number of user stories points completed across all user stories: 136/196 pts.
7. Average user stories point per day: 2.6 points/day
8. Final sprint burnup chart for this sprint:
